Sbaraglia

**“A story that starts from
the love for our work.”**

TO MY FATHER.

Sbaraglia S.r.l. is a company that today operates in many sectors, from production to the construction of small and medium-sized machines for agriculture and gardening.

We take care of every aspect down to the smallest detail with innovation, attention to materials, assistance and love for our work.

This is the result of years of work with my father, Michele Sbaraglia. A person who had never lost the practical and human roots of these activities.

Family is an added value to our development lever.

Matteo Sbaraglia
